PLAN YOUR SMALL SPACE

Create the illusion of space

- **Colour**
Use light wall colours like pastels, whites and light neutrals. They open up the space and reflect more light.
- **Mirrors**
Large mirrors extend the powder room beyond its footprint.
- **Lighting**
Use natural lighting as much as possible in the form of windows and skylights.
- **Wall Hung**
A wall hung vanity creates the illusion of space that a wall basin provides by showing more of the floor, while also having the benefit of added storage.
- **Technology**
Make use of clever space-saving technology, like the side opening hinge on the Mirco vanity.
- **Dual purpose**
Use bathroom accessories that can serve multiple purposes, such as hooks, or the Staten Freestanding Toilet Caddy, which doubles as a toilet roll holder.
- **Toilet**
Consider maximising your space by using a wall hung toilet and concealed cistern.
- **Seamless design**
Match grout to tile colour for a seamless effect.
- **Scale**
Beware of scale when choosing your vanity, artwork and any other furniture or decorative pieces. Anything too large will dominate the space and make it feel smaller, with the exception of large mirrors.
- **Height**
If possible, consider raising the height of the ceiling. This will create an airy feel, even if the room is small.
- **Semi-recessed basins**
Semi-Recessed basins give the illusion of more space because the cabinet is generally slimmer than the basin.
- **Recessed cabinetry and storage**
If possible, recess a shaving cabinet into the wall or create a tiled, recessed niche in your shower for added storage without projection.

Powder Room Configuration

Surroundings

- Be mindful of leg room.
- Ensure your vanity will clear swinging or sliding doors.
- Ensure there is room to open vanity doors.

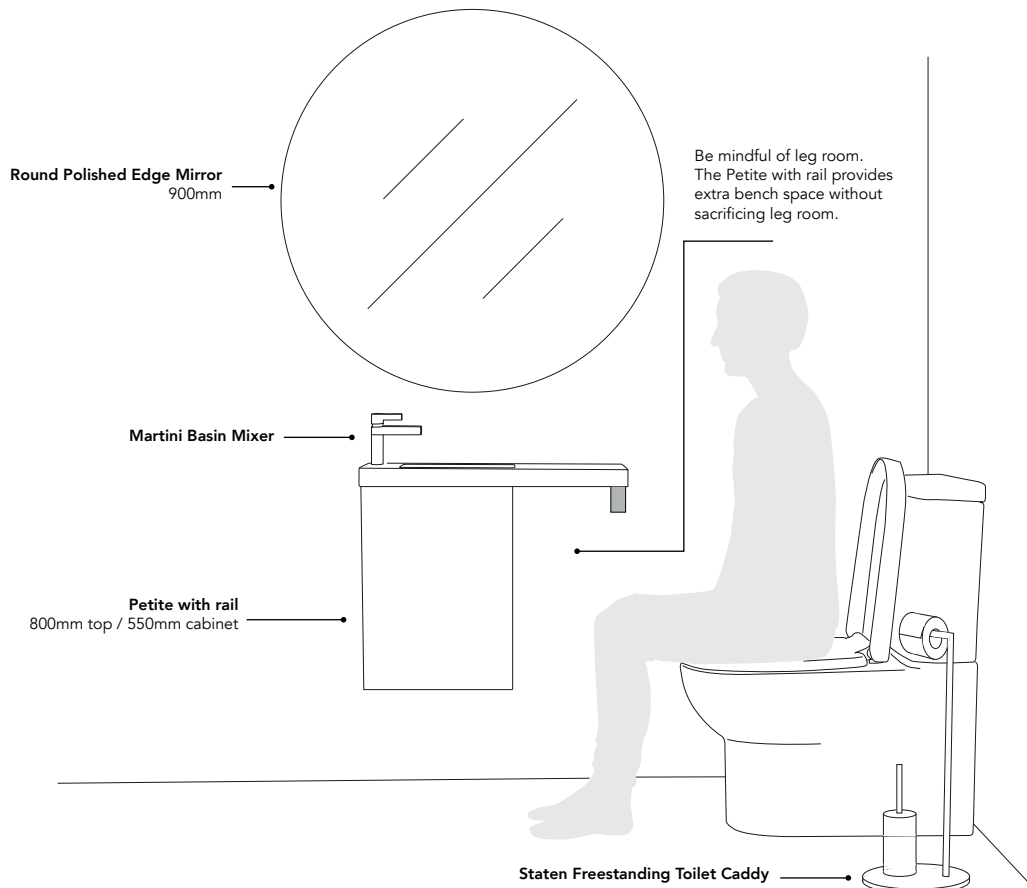

Accessibility

- Consider vanity access from the toilet for keeping spare toiletries.

Style

- Utilise dual purpose accessories.
- Create the illusion of space with large round mirrors.
- Use light colours for paint, tiles and finishings to visually open up the space.

Basin Styles & Solutions

Choosing the perfect basin style for your bathroom is vital to help create a space that is both functional and harmonious. Here is our guide to help you choose a basin type that is right for you and your needs.

Above-Counter

Above-Counter basins are the showstoppers of basin design. Available in a range of shapes, colours and finishes, they maximise storage inside a vanity cabinet as the basin does not protrude below the benchtop. Some designs can be used in a semi-recessed application in smaller bathrooms, to minimise cabinet depth and maximise basin size. Above-Counter basins pair best with wall taps or extended basin mixers due to their height above the benchtop. Make sure to consider the location of wall tapware when roughing in to avoid costly plumbing mistakes.

Semi-Inset

Semi-Inset basins are visually interesting to look at because part of the basin is hidden in the cabinet, and part of it protrudes above the benchtop. They are great for floor mount vanities to keep the height of the basin to a minimum while achieving an 'Above-Counter' look. Some Semi-Inset basins include an overflow, while some others include a built-in tap landing to contain splashing and water from wet hands turning off taps. Always consider your tapware selection when using a Semi-Inset basin to ensure the height and reach of the tap matches the height of the basin.

Inset

Create a seamless look between basin and benchtop with an Inset basin. Inset basins sit just above the benchtop, with most of the basin hidden in the cabinet. A more subtle option than an Above-Counter or Semi-Inset basin, they create an effortless flow from vanity top to basin. Inset basins work well with many tapware styles, including both basin mixers and wall taps. Available in rounded and square shapes, matte and gloss finishes, Inset Basins are a modern take on the traditional style of an Under-Counter sink.

Under-Counter

Under-Counter basins allow you to achieve a minimalist look with a clean, uninterrupted benchtop. A classic choice, Under-Counter basins are very easy to clean, just wipe along the bench and into the basin. Most Under-Counter basins come with an overflow. Consider tapware selection with your Under-Counter basin – basin mixers should have an extended reach to clear the gap between the tap hole and edge of the basin. Be mindful of the lost storage space as an Under-Counter basin will take up more room in the cabinet than other basin alternatives.

Semi-Recessed

Semi-Recessed basins are perfect for small bathrooms and Ensuite bathrooms as the vanity cabinet is slimmer than the basin. While the slim cabinet allows extra floor space in the bathroom, a Semi-Recessed basin protrudes out from the cabinet, meaning that you don't have to sacrifice on basin size. Consider using an Above-Counter basin with a semi-recessed application to achieve a more modern look than a conventional Semi-Recessed basin.

Small Spaces

We offer a range of Small Spaces basins, including wall hung solutions, above counter vessels and under-counter applications. Our collection is both space saving and functional, perfect for when space is very limited.

Wall Hung

Create the illusion of space with a wall hung basin. Perfect for commercial applications or where storage is not required, wall basins can be a cost-effective vanity solution. Wall basins are available with a range of options, including a large basin, extra bench space, or small space solutions. Make a feature of your plumbing with a bottle trap and consider pairing with a shaving cabinet or floating cabinet below the basin for additional storage.

A Timeless Collection of Freestanding Baths

We have tried and tested all of our baths for comfort and quality. You can be rest assured that your ADP bath will be as comfortable as it is beautiful.

Our European engineered baths bring you the highest quality design and attention to detail.

All of our baths are made with a Solid Cast Marble core which preserves the water temperature longer than other acrylic alternatives, providing you with a pleasant, long-lasting bath.

How to choose a bath that's right for you?

SIZE

Consider how much space in your bathroom you have for a bath. Also consider who will be using the bath most regularly. Will the kids be in it every night, or will it be used for a leisurely soak on the weekends?

STYLE

Your bath should be a continuation of the style in the rest of your bathroom. Whether you prefer a contemporary or classic look, showstopping or timeless, we have a bath to match your style.

COMFORT

All of our baths have been tried and tested for comfort and quality. We offer a range of baths in different shapes to suit various comfort preferences. Comfort is a personal choice, so explore the full range of options.

FINISH

Our range encompasses both Matte and Gloss finish baths. Matte finish baths make an elegant statement piece in your bathroom, while Gloss finishes are timeless and perfect for everyday family life.

AN IMPORTANT NOTE ON BATHROOM VENTILATION

Good ventilation will save you thousands of dollars and keep your family healthy - mould can be a huge problem in bathrooms if they're not properly ventilated.

Moisture can be the root of all wet area products breaking down and failing, in particular your vanity and mirror. These products are usually water resistant not waterproof so it's important moisture does not build up which will mean your products will last longer, saving you money. Good ventilation is also key to achieve lower humidity in the room which will minimise bacteria growth and prevent mould and mildew. You'll have less mildew on your grout, walls and ceilings, and fewer mould spores to threaten your respiratory health.

Signs of poor ventilation include black spotting on mirrors, paint starting to flake on the ceiling, bubbling of paint coatings on fixtures, and furniture swelling. Evidence of mould or mildew is also a good indicator that your ventilation is not adequate.

The best sign that your ventilation is sufficient is that the mirror doesn't steam up and the tiled walls aren't wet. The best way to achieve this is to have a good exhaust fan that is correctly sized for the space, to do this you need approximately 50 cfm per toilet and 50cfm per shower or bath. Run the fan every time water is being used in the bathroom and run it for around 15 minutes after you shower. If you have a bathroom window, opening that daily (even in the chilly winter months) in addition to using the exhaust fan will help to keep your bathroom fresh and mould-free.

CARE & MAINTENANCE

If you cannot identify basin, top or cabinet material of your product, contact your merchant or see product information at www.adpaustralia.com.au.

TIPS

- ADP products are produced from materials that are well suited to the bathroom, however it is important that your bathroom has sufficient ventilation to avoid excessive moisture. High humidity will lead to permanent dampness and mould, resulting in deterioration of the materials.
- Care must always be taken to dry any excessive moisture or water spillage.

CABINETS

- To maintain the finish on your cabinet use only a soft cloth and weak solution of non-abrasive detergent.
- To remove scratches, marks, etc. on two pack polyurethane, rub gently with car cutting compound, car polish or household brass/silver cleaner.
- Goods used in construction are water/moisture-resistant, but not water-proof.
- All cabinets should be installed at least 300mm away from showers or bathtubs to avoid water damage.

CAST MARBLE & ACRYLIC

- To maintain the finish on your Cast Marble or Acrylic top use only a soft cloth and weak solution of non-abrasive detergent.
- To remove scratches, marks, etc. rub gently with car cutting compound, car polish or household brass/silver cleaner.
- Cast Marble basins and tops have a maximum water temperature of 70°C, to avoid thermal shock - heat damage or crazing.
- Acrylic tops have a maximum water temperature of 65°C, to avoid thermal shock - heat damage or crazing.

CERAMIC BASINS AND TOPS

- To maintain the finish on your ceramic top use only a soft cloth and weak solution of non-abrasive detergent.
- Due to the glazed surface of ceramic tops, scratches cannot be repaired or removed.
- Due to ceramic being a handcrafted product that is fired at high temperatures, some visual distortion may occur. This is not a defect but can be seen to add to the beauty of the product.
- Ceramic basins and tops have a maximum water temperature of 65°C, to avoid thermal shock - heat damage or crazing.

SOLID SURFACE / CHERRY PIE / FRIDAY HYBRID QUARTZ / CAESARSTONE

- Wipe clean with a soft damp cloth or sponge.
- For basic stains clean with mild detergents. For **gloss and semi-gloss** surfaces you can use a non-abrasive polish or Brasso. For **matte** surface use a scourer pad or scotch bright to maintain the matte finish.
- Cherry Pie, Friday Hybrid Quartz™ and Caesarstone® benchtops have excellent heat and chemical resistant properties compared to other surfacing products, however to preserve the surface and protect against damage from heat, do not place hot items directly on the surface. Even though Cherry Pie, Friday™ and Caesarstone® can withstand high temperatures, prolonged periods or extreme heat can cause permanent damage.
- Solid Surface basins and tops have a maximum water temperature of 65°C, to avoid thermal shock - heat damage or crazing.

MIRRORS

FOR BEST RESULTS - use a slightly moistened microfibre cloth to remove dry dirt or grime, then buff clean with dry microfibre cloth or use a soft dry cloth with a tight weave (which is more soft and non-abrasive). This will leave you with a clean, smear-free finish. By using alkaline (ammonia) or acid (vinegar) based products you not only risk damaging the silvered backing of the mirror, but also tend to leave behind streaks and smears.

DO NOT USE WINDEX or other ammonia-based cleaning products such as glass cleaner. These may erode the mirror's silver backing. Be sure to read the label of any such cleaning products before use.

PROTECTION AGAINST 'BLACK-SPOTTING' - Alkaline, acid and moisture elements can cause the silvered backing of a mirror to darken, this is usually referred to as 'black-spotting'. **An easy way to protect your mirror against black-spotting is to ensure your bathroom is well ventilated** and regularly oil any exposed edges (i.e. polished or bevelled edges), using non-petroleum based oils (eg. sewing machine oil). This will act as a seal to protect against such elements. Always remember to keep your mirror dry and wipe off any water, moisture or steam. Don't forget to use the exhaust fan or open a window if you have one!
